

How a Half-Penny Benefit

Bridge to Success Academy at Saint Clair Evans

A Referendum for School Facilities and Economic Growth

The Direct Impact on Bridge to Success Academy at Saint Clair Evans

Students attending Bridge to Success Academy will be relocated to the newly renovated Saint Clair Evans campus.

First and foremost, the school will use referendum dollars to improve safety and security. It means system upgrades and improvements such as new security cameras, additional fencing, and more secure entrances and exits.

Many of the maintenance items at this school have been deferred due to cutbacks from the state. With the passage of the referendum, these maintenance items can now be addressed with new funding for repairs. That means anything from playground equipment to drainage fields on school grounds. The school is eligible for roof repairs and exterior facade improvements. If the air conditioner needs repair or replacement, the funds will be there to take care of it. Some things you can't see, such as plumbing or electrical problems, will be addressed as well.

Finally, this school will receive renovation dollars based on the repair need and size of the building. This goes beyond deferred maintenance and includes items such as entire classroom rebuilds and reconfigurations to meet the needs of today's technology and style of teaching and learning.

Overall, students will have a safer, sturdier, and better functioning building in which to learn and enjoy.

BTS at West Jax Allocation

\$438,050

Site Removal Allocation

\$438,050

Upon the completion of new construction, the site removal allocation is based on the size of each school site to remove either part or all of the building. This cost is associated with the removal of the West Jacksonville site.

Saint Clair Evans conversion Allocation

\$6,756,041

Safety & Security Allocation

\$293,615

The safety and security allocation is calculated based on the square footage of each school site. This funding is designed to cover any site hardening such as security cameras, gates, and alert systems.

Facility Condition Improvements

\$4,994,351

The deferred maintenance allocation is calculated based on projected maintenance of each school site. This funding is designed to fix all current and projected maintenance issues over five years.

Renovations Allocation

\$1,468,075

The renovations allocation is calculated based on the square footage of each school site. This funding is designed to cover additional repairs and renovations outside of the deferred maintenance allocation such as flooring, painting, and classroom reconfigurations.
